

We would highly recommend Expert Crane for all of the services they offer. Not only have they completed our Annual PM work for the 15 Cranes we have in the Ohio Profiling facility (at a highly competitive price when compared to others locally) they have additionally built and installed 4 new cranes ranging from 5 ton to 25 ton capabilities. We are pleased with their service, professionalism, capabilities and thorough reporting when it comes to Crane Management. If you are given the opportunity, take a tour of their new facility here in Cleveland. It is pretty impressive and they have great people running the business from the Doty family and all across the board.

Scott Wilson
Plant Manager, Steel Warehouse Ohio Profiling
