To Expert Crane,

We recently had Expert Crane install (two) 2-Ton capacity overhead cranes in our Weld Shop. We have eleven other overhead cranes in our facility with this being our first experience using Expert for design and installation of new cranes. We could not be more pleased with our experience in using Expert Crane. The style of cranes they suggested, designed and installed has greatly met our needs. Installation of these cranes will greatly increase our shop productivity, as well as, provide a safer system of conveying our product.

The professionalism, concern to details and receptiveness to our needs beginning with their Director of Operations through their Design Engineers, office Personnel and finally to the Installers was exceptional.

We would highly recommend Expert Crane for any needed crane services.
